Modern Approaches in Measurement: Lecture 13

Klint Kanopka

New York University

Table of Contents

1. Measurement - Week 13

1. Table of Contents

2. Course Evaluations

2. Guest Lecture

3. Wrap Up

Course Evaluations

- As pre-tenure faculty, having these filled out is helpful for me!
- Take 20ish minutes to fill out:
 - My personal course feedback form at: <https://forms.gle/RRHmejCwAxmSuVmX7>
 - The official course evaluations at: <https://coursefeedback.nyu.edu/nyu/>

Guest Lecture

Guest Lecture: George Perrett

- George is a first year Ph.D student in the Applied Statistics and Computational Social Science Program working at the intersection of causal inferences and machine learning.
- Prior to his doctoral studies he was awarded a Masters of Science in Applied Statistics (NYU), a Masters of Public Health (University of Michigan), and a Bachelor of Arts in Psychology (University of Wisconsin).

Wrap Up

Wrap Up

Wrap Up

- Measurement is a necessary (but insufficient) condition for good science

Wrap Up

- Measurement is a necessary (but insufficient) condition for good science
 - This is much harder in the social and behavioral sciences than it is in the natural sciences!

Wrap Up

- Measurement is a necessary (but insufficient) condition for good science
 - This is much harder in the social and behavioral sciences than it is in the natural sciences!
- The things we covered here were designed to give you a toolkit that you can use to answer interesting questions

Wrap Up

- Measurement is a necessary (but insufficient) condition for good science
 - This is much harder in the social and behavioral sciences than it is in the natural sciences!
- The things we covered here were designed to give you a toolkit that you can use to answer interesting questions
 - Obviously there's a ton more to learn

Wrap Up

- Measurement is a necessary (but insufficient) condition for good science
 - This is much harder in the social and behavioral sciences than it is in the natural sciences!
- The things we covered here were designed to give you a toolkit that you can use to answer interesting questions
 - Obviously there's a ton more to learn
 - If you ever need support in the future, let me know!
